

# Camera and Microphone configuration SUMADI V2 - Mac

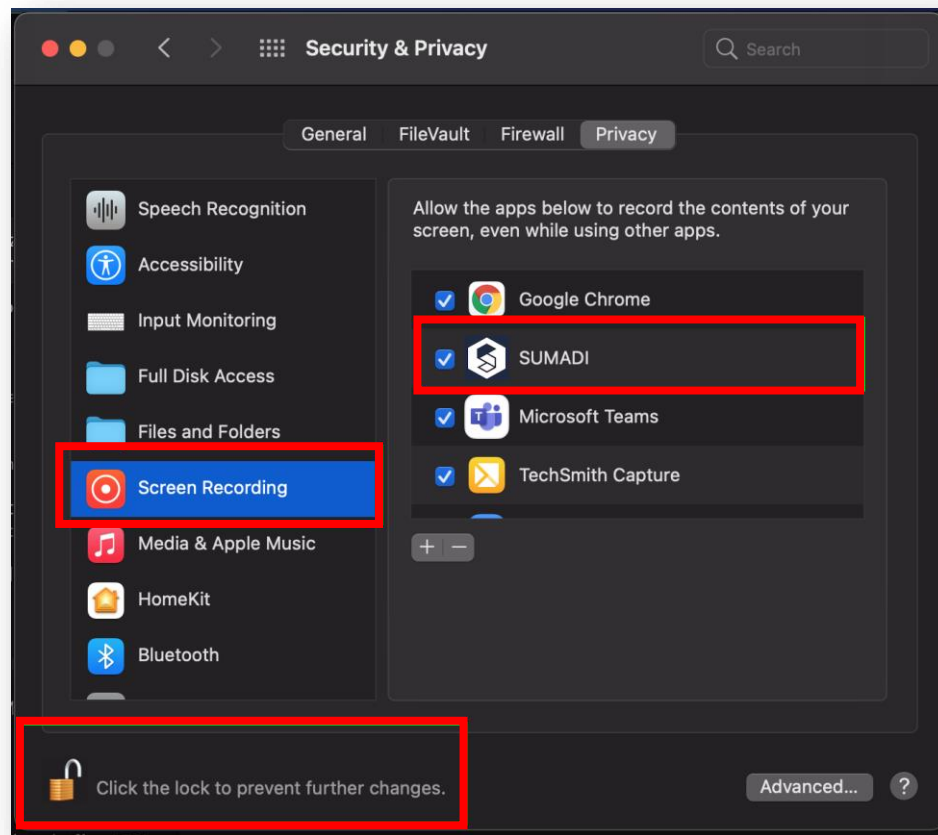

On macOS, both Catalina and Big Sur, you must activate **screen recording permissions** for a proper SUMADI™ functionality.

- 1 Go to the **System Preferences** section and select the "**Security and Privacy**" option.

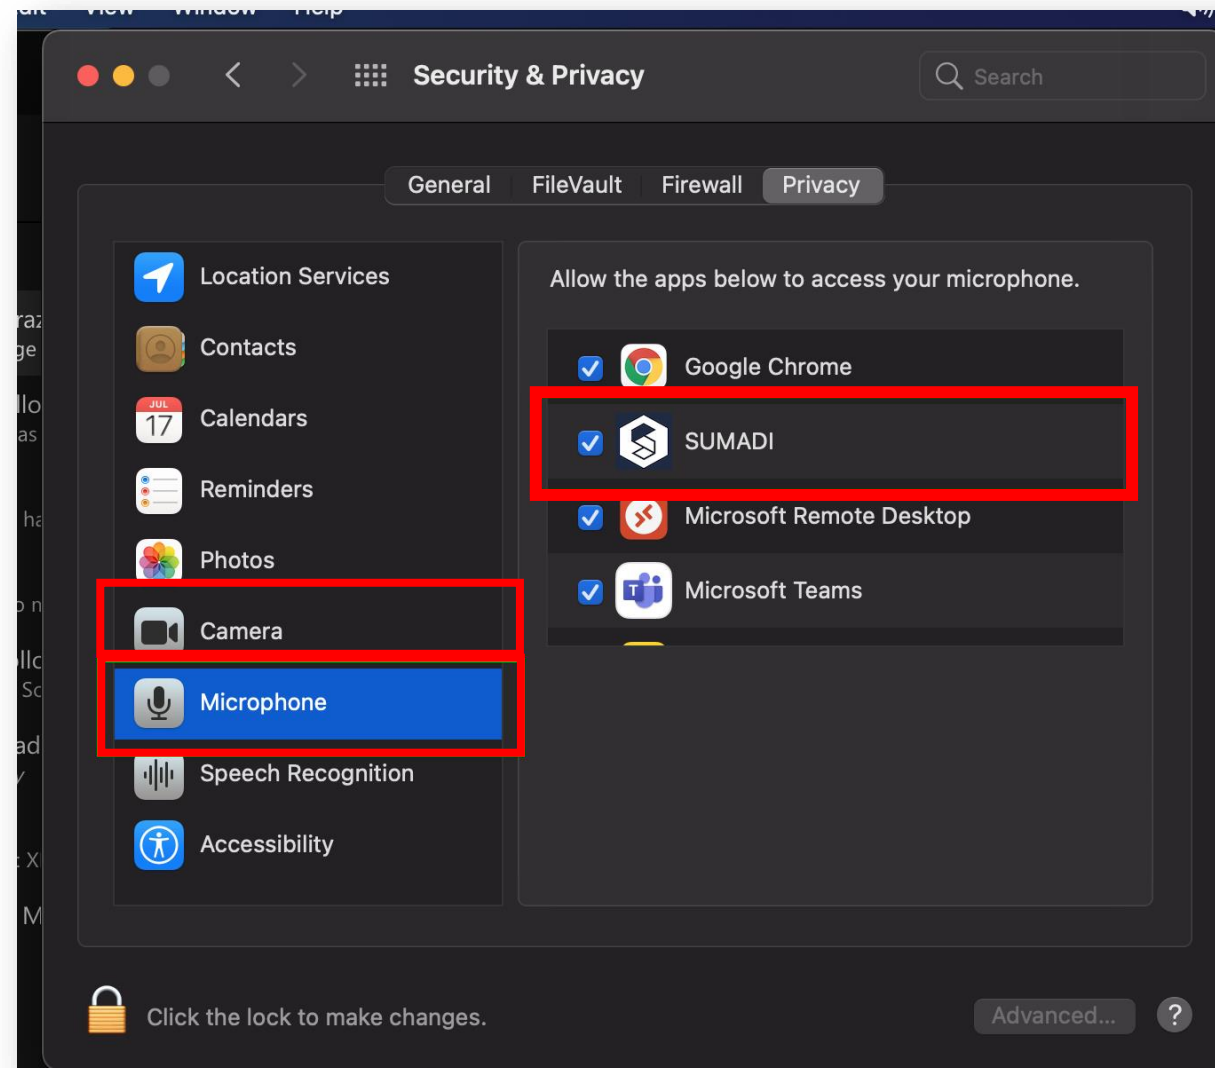

- 2 Click on the "**Screen recording**" option and grant access to SUMADI™ to record screen content.
- 3 To add an app, click the **Add(+)** button and select the app from the list, and click **Open**.

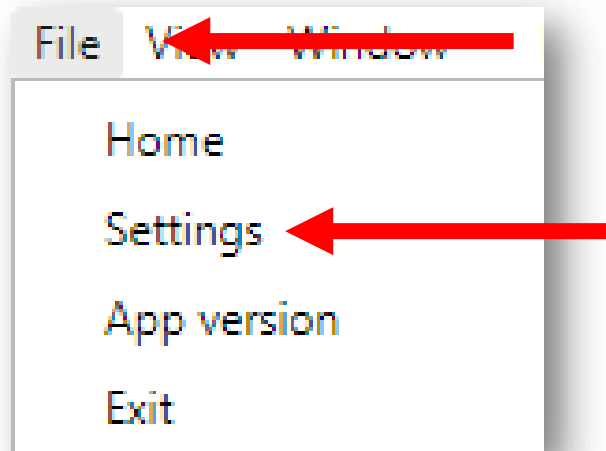

**Note:** If the lock at the bottom left of the panel is locked, click it to unlock the preferences panel.

- 4 Select the "**Camera**" and "**Microphone**" options to allow access to the SUMADI™ application.

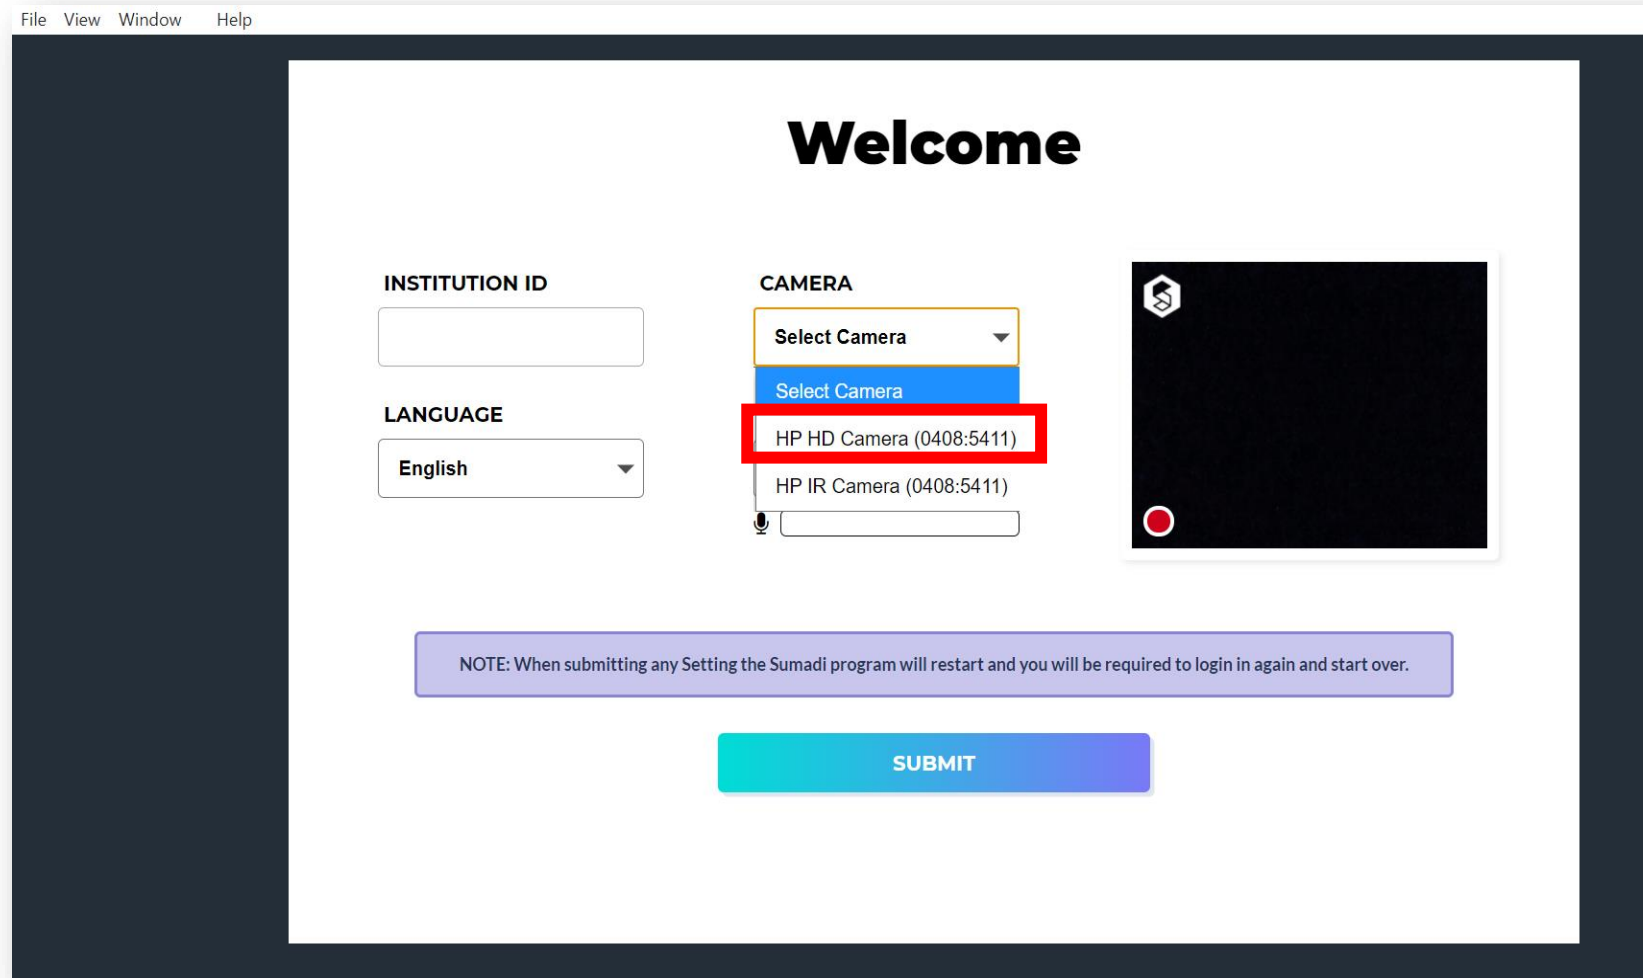

## Camera Configuration

- 1 Click the **File** button on the toolbar located in the upper left corner of the SUMADI™ app.
- 2 Click on the **Settings** option.

### 3 Select the integrated camera in your computer.

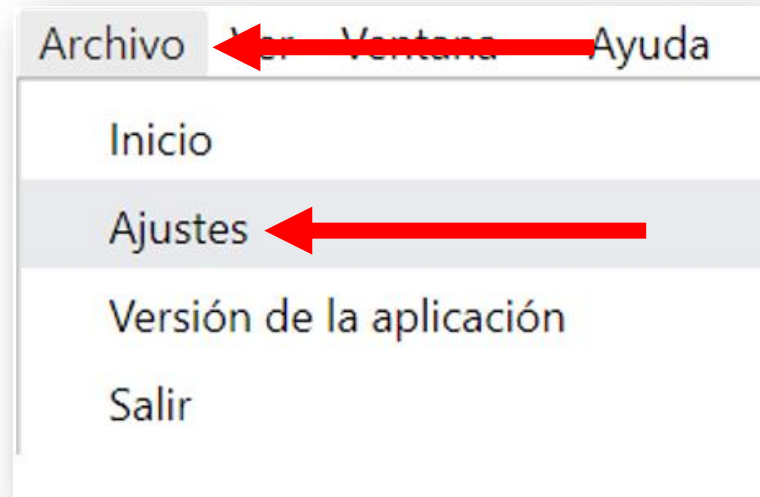

The screenshot shows a web application window with a menu bar (File, View, Window, Help) and a main content area. The content area has a dark blue header with the word "Welcome" in white. Below the header, there are three columns of form elements. The first column has an "INSTITUTION ID" label and an empty text input field. The second column has a "LANGUAGE" label and a dropdown menu with "English" selected. The third column has a "CAMERA" label and a dropdown menu with "Select Camera" selected. Below the dropdown menu, there are two options: "HP HD Camera (0408:5411)" and "HP IR Camera (0408:5411)". The "HP HD Camera (0408:5411)" option is highlighted with a red border. To the right of the camera selection area is a video feed window showing a black screen with a small white icon in the top left and a red circle in the bottom left. Below the form elements is a purple notification box with the text: "NOTE: When submitting any Setting the Sumadi program will restart and you will be required to login in again and start over." At the bottom center is a blue "SUBMIT" button.

**Note:** Make sure not to select a virtual or IR camera, such as **Snapcamera**, **DroidCam**, or **Iriun webcam**.

## Microphone Configuration

- 1 Click the **File** button on the toolbar located in the upper left corner of the SUMADI™ app.
- 2 Click on the **Settings** option.

3 Select the microphone connected to your computer.
