

How to create a facial profile - Edusoft

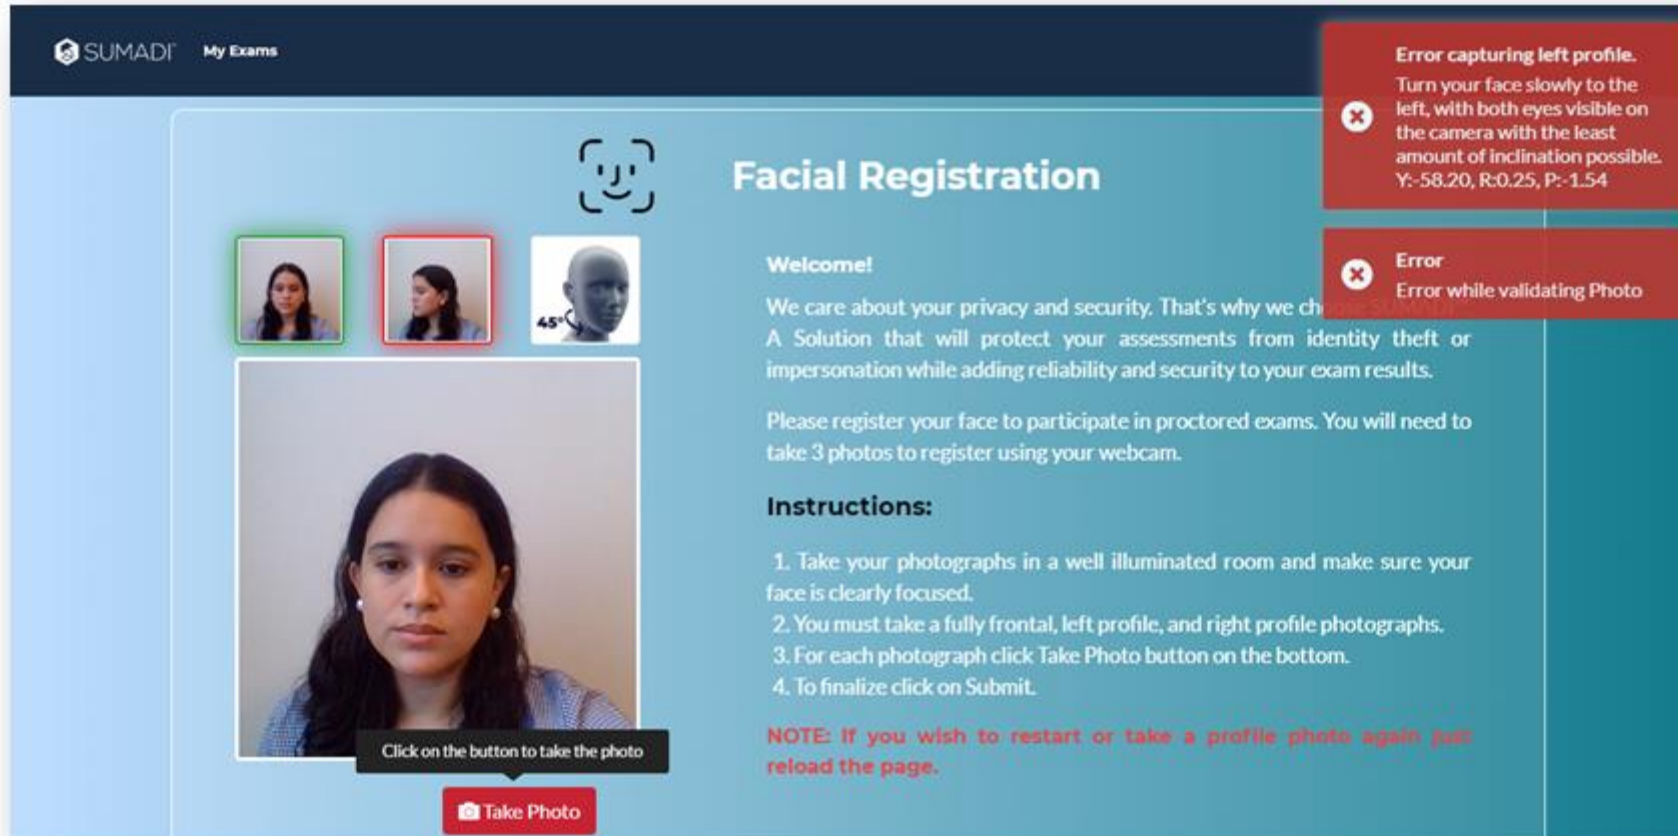

- 1 If this is your first time taking an exam with SUMADI™, you will be requested to register your facial profile. At the Facial Registration screen, click the **Take Photo** button. You will need to take three photos as the described angles in the following image:

Note: Do not turn your face entirely in the left and right profile photos, only slightly at a 45° angle.

NOTE: If one of the images is not taken at the requested angle, an error like the one in the following image will appear.

The screenshot shows the 'Facial Registration' interface on the SUMADI My Exams platform. The interface includes a header with the SUMADI logo and 'My Exams' text. Below the header, there is a navigation bar with a smiley face icon and the title 'Facial Registration'. The main content area is divided into two columns. The left column features a large video feed of a user's face, with three smaller thumbnail images above it showing different angles: a frontal view, a left profile view, and a right profile view. A 'Take Photo' button is located at the bottom of the video feed. The right column contains a 'Welcome!' message, a brief explanation of the registration process, and a list of instructions. A red error message box is overlaid on the right side of the interface, indicating a problem with the left profile photo.

Facial Registration

Welcome!

We care about your privacy and security. That's why we chose a Solution that will protect your assessments from identity theft or impersonation while adding reliability and security to your exam results.

Please register your face to participate in proctored exams. You will need to take 3 photos to register using your webcam.

Instructions:

1. Take your photographs in a well illuminated room and make sure your face is clearly focused.
2. You must take a fully frontal, left profile, and right profile photographs.
3. For each photograph click Take Photo button on the bottom.
4. To finalize click on Submit.

NOTE: If you wish to restart or take a profile photo again just reload the page.

Error capturing left profile.
Turn your face slowly to the left, with both eyes visible on the camera with the least amount of inclination possible.
