

Download and Install SUMADI App - Windows

Installing SUMADI™ (Windows)

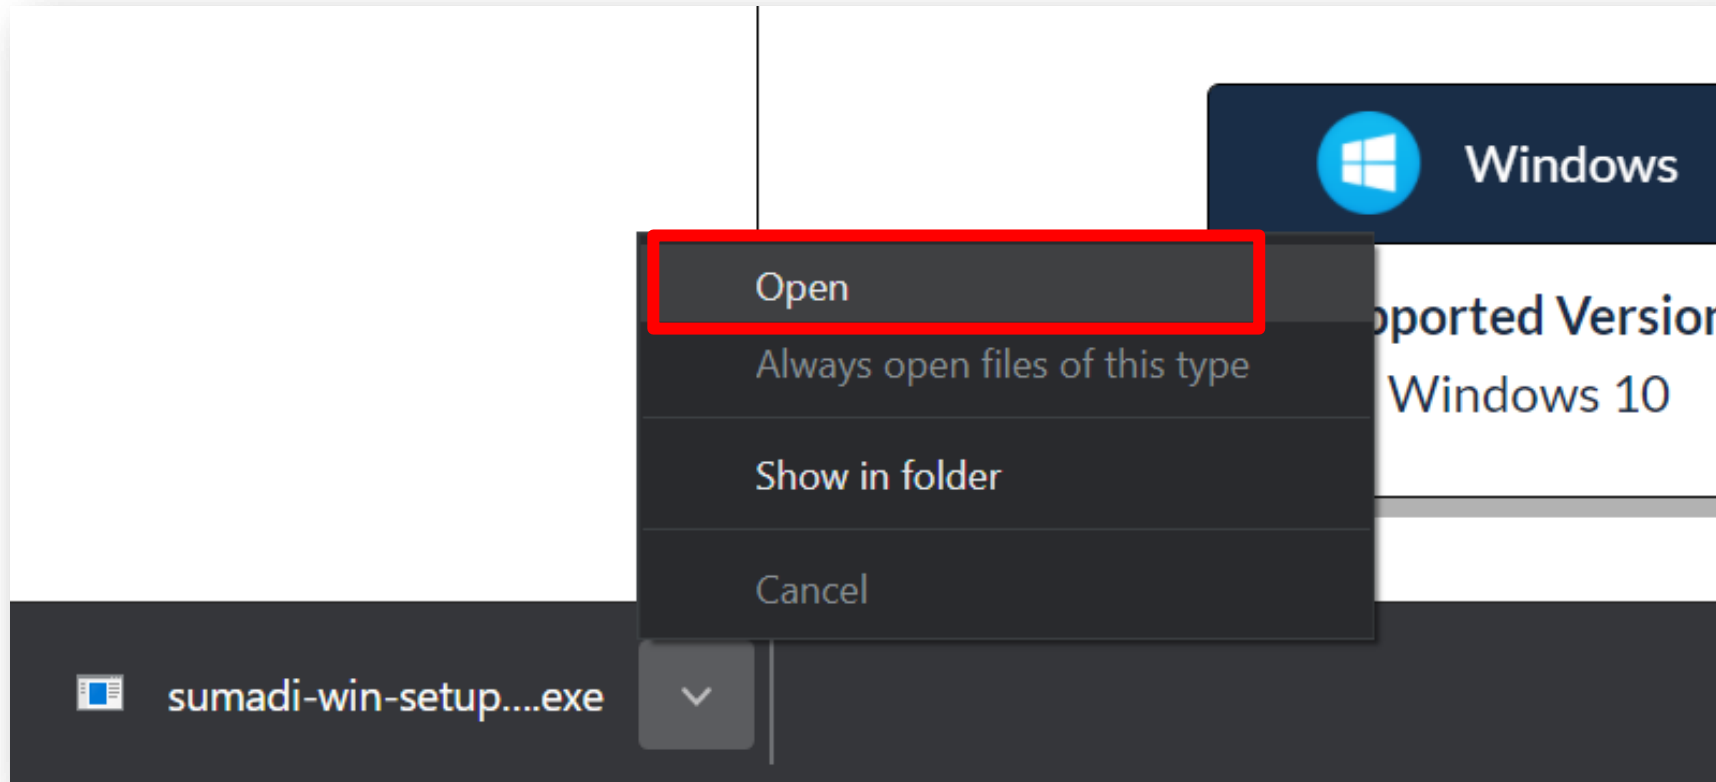

To download the **SUMADI™ App** and be able to take your exam you will need to use the **Google Chrome** browser.

- 1 Using Google Chrome, enter the URL link you received from your institution to download the SUMADI™ App.

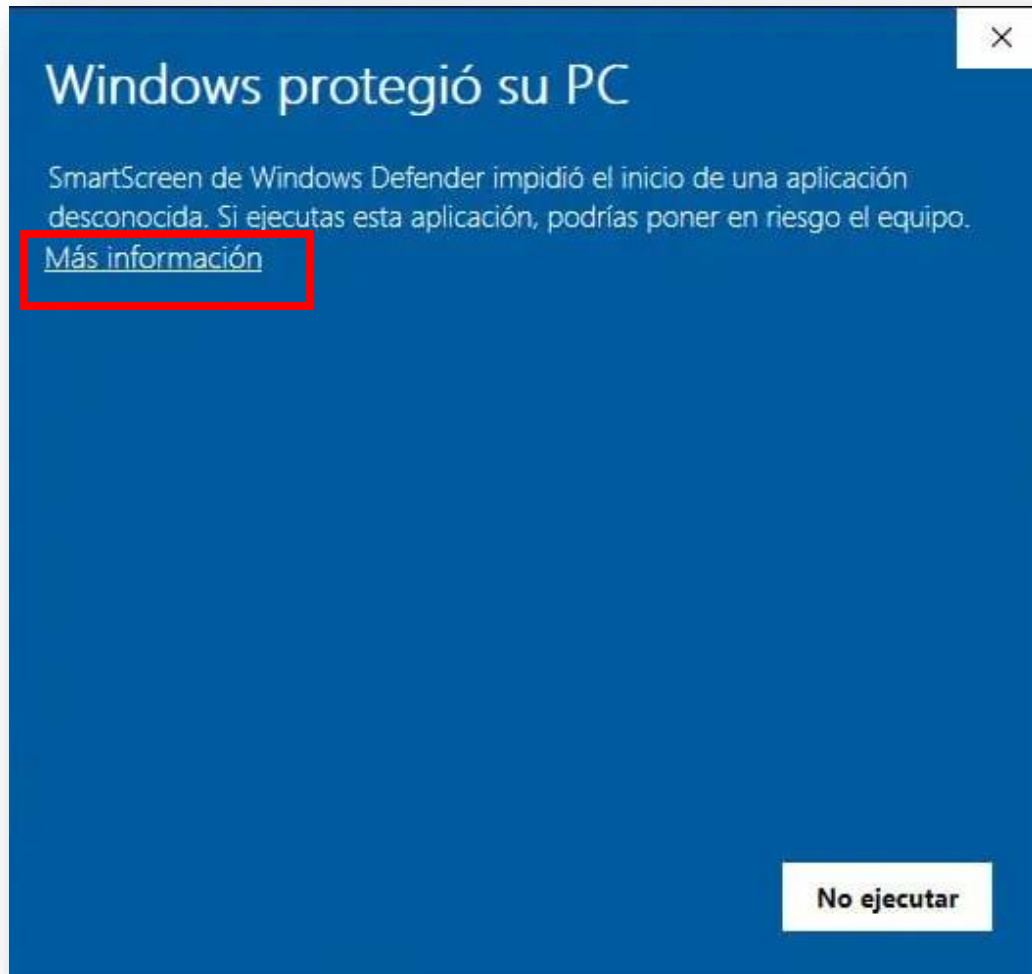

- 2 Press the "**Windows**" button to start the download.

- 3 Once you have finished downloading, click on the more options button of your download in the lower left corner of your screen and choose the *Open* option.

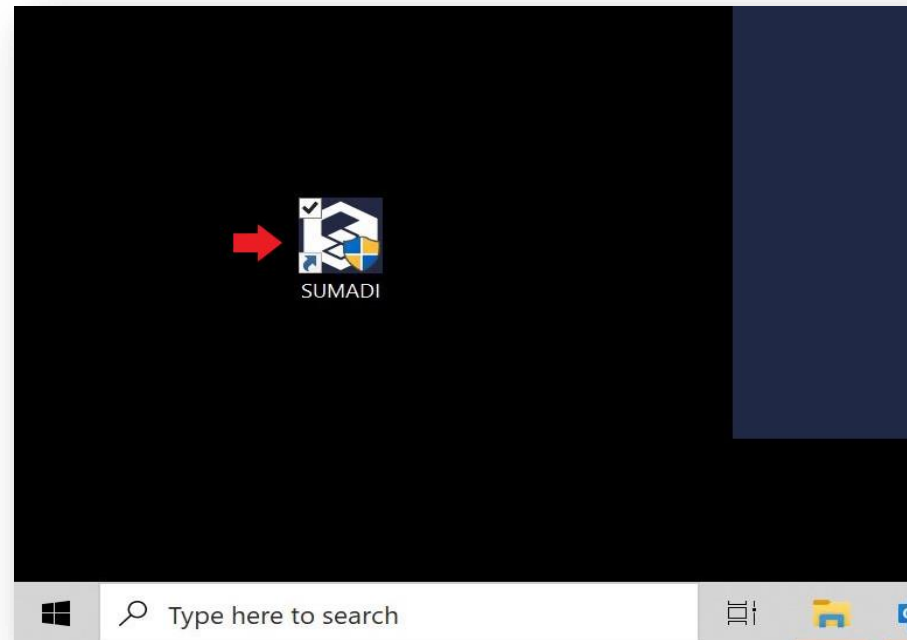

- 4 In case you receive a protection notification from Windows Defender, select the option "**More information**" and then "**Run anyway**".

- 5 Your computer may ask you to authorize "SUMADI™" to make changes to your computer; you must click on the **"Sí / Yes"** option.

- 6 The app is ready to be installed.
- 7 Once the App is installed, locate the download file and click on it or go to your "**Applications**" folder and click on SUMADI™, this will create a shortcut icon on your desktop.

Note: Make sure to close all background apps.

- 8 In case you have not given administrator permissions to SUMADI™, go to the search bar and type the name of the app and click on the ***"Run as administrator"*** option.
